

FOR IMMEDIATE RELEASE

August, 2010

SUPREP® BOWEL PREP KIT (sodium sulfate, potassium sulfate and magnesium sulfate) Oral Solution is NOW APPROVED.

Braintree Laboratories, Inc., has received FDA approval for its newest product, SUPREP® BOWEL PREP KIT. The SUPREP® BOWEL PREP KIT is an efficacious, low-volume regimen which is indicated for the cleansing of the colon prior to colonoscopy in adults. Braintree is especially pleased to announce that SUPREP® is Braintree's first colonoscopy preparation with ACG-recommended split-dosing for effective preparation. "Years of research at Braintree have culminated in the approval of SUPREP®," said Harry Keegan IV, Vice President, Marketing and Sales. "We are very excited by its 98.4% efficacy result in a Phase III trial."¹ SUPREP® does **not** contain sodium phosphate, a type of salt that has been linked to kidney failure in some patients.

Braintree Laboratories is a privately held pharmaceutical company that was founded in 1982 in Braintree, Massachusetts. Braintree pioneered the first gastrointestinal lavage in 1984 with the introduction of GoLYTELY® (PEG-3350 and Electrolytes for Oral Solution), which was soon adopted as a standard prepping procedure. Today, Braintree Laboratories has four gastrointestinal lavages available in the US market.
